# Zoom security Hints and Tips

Privacy and security is a top priority for Zoom, all users can find resources and features on how Zoom secures your data and protects your privacy. Here are just a few hints and Tip to get you started.

## Pre-Meeting

Zoom has a set of robust pre-meeting features you can se to secure your meeting before it even begins:

- **Waiting Rooms:** IT Admins can enforce waiting rooms at the account, group, or user level. You can also require them for all participants, or just for guests not included in your account.
- **Passwords:** Passwords can be set at the individual meeting level or can be enabled at the user, group, or account level for all meetings and webinars. Account owners and admins can also lock password settings, to require passwords for all meetings and webinars on their account.
- **Join by Domain:** Only authenticated users can join meetings which requires individuals to sign into a zoom account and/or ensure their e-mail address is on an approved list before allowing them to join.

## In-Meeting

You can make sure your Zoom meeting is secure and disruption free through some simple controls:

- **Toolbar security options:** Meeting hosts have a Security icon in the toolbar for quick access to essential in-meeting security controls.
- **Lock the meeting:** When a host locks a Zoom Meeting that's already started, no new participants can join, even if they have the meeting ID and password.
- **Remove participants:** From that Participants menu, you can mouse over a participant's name, and several options will appear, including "Remove".
- **Mute participants:** Hosts can mute/unmute individual participants or all of them at once. Hosts can block unwanted, distracting, or inappropriate noise from other participants. You can also enable "Mute Upon Entry" in your settings, which is a good option for large meetings.
- **Disable video:** Hosts can turn someone's video off. This will allow hosts to block unwanted, distracting, or inappropriate gestures on video.
- **Do not allow participants to rename their ID:** The host can disable the ability for participants to rename their onscreen identity.
- **Turn off file transfer:** In-meeting file transfer allows people to share files through the in-meeting chat.

# How to set up a virtual background in Zoom

The virtual background feature allows you to display an image or video as your background during a Zoom Meeting. It works best with a physical green screen and good uniform lighting so your camera can detect the difference between you and your background.

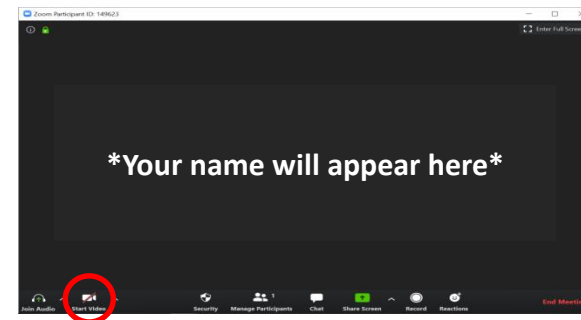

- 1** Open up the Zoom desktop app that is on your computer's home screen – it might look a little like this

- 2** Once this has opened, you will arrive in your home area, select the orange button called 'New Meeting'

- 3** To turn on your web camera, click on the 'Start Video' button at the bottom of the screen. You should now see yourself on the video camera

- 4** Click on the upwards arrow on the right hand side of the video camera button (that now says 'Stop Video') and some more options will appear

- 5** Select option 'choose virtual background'.

# How to set up a virtual background in Zoom

The virtual background feature allows you to display an image or video as your background during a Zoom Meeting. It works best with a physical green screen and good uniform lighting so your camera can detect the difference between you and your background.

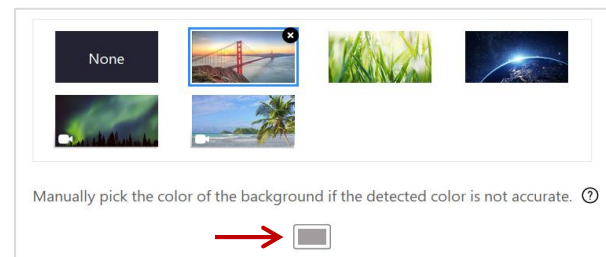

- 6 A selection of backgrounds that Zoom provides will appear. Select which background you would like to use by clicking on the image

**Note:**

- You are also able add your own background of your choice by pressing the plus button on the right, add image and then uploading any pictures or videos you have saved in your files.*
- You will get clearer results when you have a solid colour in the background of your video and there are no objects in the frame e.g. pictures on the wall.*

- 7 You need to choose which colour/ area of own home background you would like the virtual image to display on. Click on the box underneath the images and 'manually pick colour' statement

- 8 An arrow like this will appear on your webcam screen

- 9 Use this to select which area/ colour you would like to place the virtual background image. Click on it and your background will show up on the area you have selected.

- 10 You have now successfully selected you're the background, exit the tab and return to your meeting where you will find that the background has been set.
